Global Production Networks Theorizing Economic

Instead, global production networks are organizational platforms through which actors in these different national or regional economies compete and cooperate for a larger share of the creation, transformation, and capture of value through transnational economic activity.

Global Production Networks: Theorizing Economic ...

Production in the global economy has undergone a qualitative shift towards a spatially more dispersed and organizationally more fragmented form. Contemporary production of goods and services in many sectors can best be envisioned as networks, which consist of multiple economic actors interconnecting multiple locations in a highly complex fashion. The rise of global production networks (GPNs) is 'perhaps the predominant organisational feature of the world economic system' (p. 3). argue ...

Global Production Networks: Theorizing Economic ...

Abstract. Accelerating processes of economic globalization have fundamentally reshaped the organization of the global economy towards much greater integration and functional interdependence through cross-border economic activity. In this interconnected world system, a new form of economic organization, termed global production networks (GPNs) in this book, has emerged that brings together a wide array of economic actors, most notably capitalist firms, state institutions, labour unions, ...

(2015). Global Production Networks: Theorizing Economic Development in an Interconnected World. European Planning Studies: Vol. 23, European Creative Regions, pp. 2621-2624.

Global Production Networks: Theorizing Economic ...

In this interconnected world system, a new form of economic organization has emerged: Global Production Networks (GPNs). This brings together a wide array of economic actors, most notably capitalist firms, state institutions, labour unions, consumers and non-government organizations, in the transnational production of economic value.

Global production networks: theorizing economic ...

In Global Production Networks: Theorizing Economic Development in an Interconnected World the authors develop a nuanced and interesting account of the centrality of value capture to regional economic development strategies, writes Christopher May, who finds this literature to be a useful step towards a more fully political economic analysis of global production networks.

Book Review: Global Production Networks: Theorizing ...

Global production networks (GPNs) have become a key framework in conceptualizing linkages, power and structure in globalized production. However, this framework has been less successful in integrating the influence of digital information and ICTs in production, and this problematic in a world where relationships and power are increasingly mediated by digital information flows and resources.
