The ERS-education website provides centralised access to all educational material produced by the European Respiratory Society. It is the world's largest CME collection for lung diseases and treatment offering high quality e-learning and teaching resources for respiratory specialists. This distance learning portal contains up-to-date study material for the state-of-the-art in Pulmonology.

ERS - Paediatric Respiratory Diseases

In general, pediatric airways are smaller, less rigid, and more prone to obstruction. Children also have higher respiratory rates than adults making them more susceptible to agents in the air. The anatomy of a child's lungs and other components of the pulmonary (respiratory) system make treating pediatric lung disease a very specialized practice.
