If your AC isn't as cool as it used to be, you may need a R134a refrigerant recharge kit. AC does more than cool the air, it also dehumidifies and recirculates air through the cabin. A working air conditioning system is essential to a comfortable ride, but an AC unit won't work without AC refrigerant, R134a.

Before we go into the specifics, such as when to recharge your AC, let's explain what we mean by recharging. In reality, the term should be refilling because that's actually what's happening. At no point does a recharge involve electricity until after the repairs and maintenance are completed and you turn the system on.
