Ludwig-Soret effect) is a phenomenon observed in mixtures of mobile particles where the different particle types exhibit different responses to the force of a temperature gradient. The term thermophoresis most often applies to aerosol mixtures, but may also commonly refer to the phenomenon in all phases of matter.

Soret effect on the long term stability of high temperature

thermoelectrics is briefly discussed.

Typical Soret coefficients for nonstoichiometric compounds are found to be of the order of

$(d\delta/dT) \approx 1\%/K$. Key words : Soret effect, Thermodiffusion, Thermoelectrics, Degradation 1.
